

Give Together

At UCHealth, giving back is part of who we are. We give support to patients in need. We give aid to employees experiencing hardships. We give to accelerate advances in care across service lines. We **Give Together**.

Why give?

You have the power to change the face of health care in your community by investing in what you believe in most.

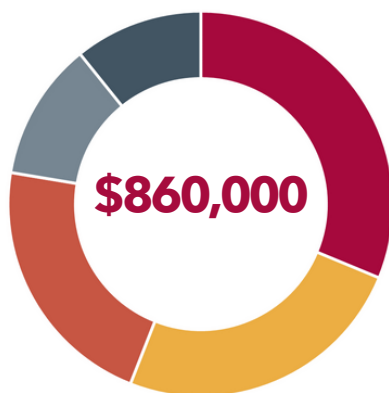

Employees can contribute PTO, one-time gifts or recurring gifts to "set it and forget it." Funds range from areas of greatest need, patient assistance, employee support, and so much more!

Giving is more than an extension of the impact of your daily work, it's a gesture of your dedication to the greater good: helping move from health care to health.

The Impact of Employee Giving in FY23

- Service line support
- Employee assistance
- Area of greatest need
- Employee education
- Patient & community assistance

Your gifts give people the power to live extraordinary lives. You can choose to benefit patients through disease-specific programming, prevention and education programs, and basic needs assistance.

You can also choose to benefit colleagues and promote our UCHealth culture through employee scholarships and the Employee Hardship Relief program.
